

Final Report

Ye Wang Hao Chen

We aim to create a simple and easy to use to-do list web app.

First you will see the main function of our website: saving stuffs you input and sends them to the database. If you try to submit without logging in, it will remind you that “please log in to submit”.

Memos here:

Show all past History

After clicking “New account” button, you will see a registration page where requires your name and password.

Please enter your name to register:

Name:

Password:

After you complete the registration and login, on the top left corner will show a welcome

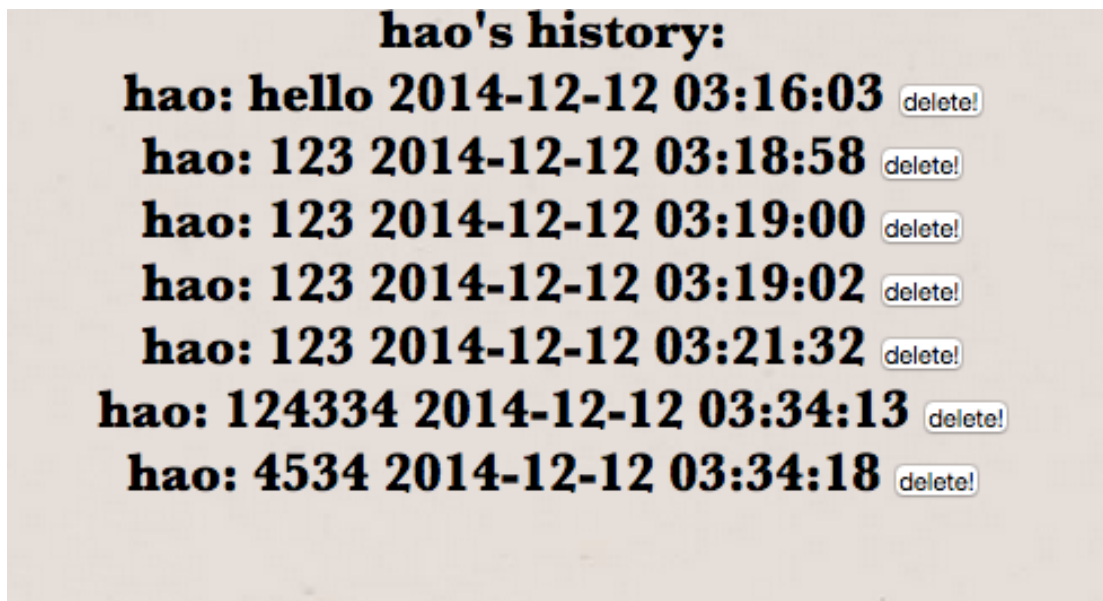

message on the top left of the page , and cookie will remain for 7 days so you don't need to login again during that time.

Then you can start to write down something and click "submit", everything you input will be placed into the databases. If you want to see all submission, simply click

Show all past History

After this, you are able to see your history with your name, contents, and time of submission.

If you finished one of these works, click that small delete button, it will delete both this line on the webpage and in the databases.

User history is saved separately and each user have individual storage for the lists.
